

NATO EDGE 24

Tampa - Florida - USA
3 - 5 December

**The NCI Agency is thrilled to announce the
2024 NATO Edge edition!**

ABOUT NATO EDGE

NATO Edge is the NATO Communications and Information (NCI) Agency's flagship event that combines technology and business dimensions, highlighting upcoming business opportunities and technology roadmaps to deliver NATO capabilities.

Over the last 15 years, the NCI Agency has fostered two successful events – the NATO Information Assurance Symposium (NIAS) and the Agency's flagship industry conference, NITEC. In 2022, the Agency introduced NATO Edge, which combines these two conferences to bring a new flagship technology event for business, political leaders and the NATO enterprise.

The event connects local tech and business communities with transatlantic partners. Previous NCI Agency events were delivered in Mons (Belgium), Berlin (Germany), Oslo (Norway), Ottawa (Canada) and Tallinn (Estonia). This is the first Agency event in the United States of America.

NATO Edge 24 - Save the date

Watch on  YouTube

What to expect in this 2024 edition?

- Theme focused discussions and keynotes, world-class workshops, innovation challenges and pitch days covering a wide range of strategic and policy topics from a technology angle, in line with NATO's strategic goals and objectives.
- NATO's largest exhibition of technology.
- Networking opportunities and a platform for dialogue between NATO and the private sector, non-for-profits and academia.

Stay tuned. Join the conversation on #NATOEdge.

Registrations open in April 2024.

ABOUT THE NCI AGENCY

The NCI Agency helps NATO keep its edge.

What is the NATO Communications and Information A...

Watch on  YouTube

The NCI Agency is NATO's technology and cyber hub. We are a team of 3,000 civilian and military staff members, located in 34 sites throughout Europe and North America.

We help NATO and its member countries communicate and work together to fulfil their mission – preserve peace and security for nearly one billion citizens.

The Agency is on the frontline against cyber threats, protecting NATO's networks 24 hours a day, seven days a week, to prevent debilitating attacks.

Our experts provide capabilities and services that are critical to NATO's ability to fulfil its core tasks of consultation, collective defence and crisis management.

We achieve this by working in partnership with industry, academia and not-for-profit organizations.

The Agency was established on 1 July 2012 as part of a NATO reform. But the Agency was built on a 65-year legacy, as our predecessors supported Allied operations long before. We have decades of experience of working side-by-side with NATO soldiers, sailors and airmen and women.

Our work helps NATO keep its technological edge.
