BaseCamp Connect	Canada
CS Sopra Steria Company	France
RUAG	Switzerland
Long Range Services LLC	United States
Alliance Global Tech Inc	United States
Instant Connect Software LLC	United States
Parraid	United States

ATTACHMENT C

Clarification to Questions

1) What are the references of the radios to be considered?

In the RFI there was given a generic list, but not limited to. The target is to have any tactical radio supported. Please list the radios that your solution currently supports and how you plan to support new radios (define also HW and SW needs to integrate new radios)

2) Which FMN spiral is targeted and what chatting protocols are to be implemented?

Minimum FMN Spiral in force; the solution should be capable to integrate the forthcoming FMN Spiral versions

3) Are radio relay functions requested?

The minimum required functionalities have been provided in Annex B of the RFI document

4) Are data and information level broadcasted by radios restricted or classified?

The solution must support all types of NATO classified or unclassified information

5) What are the expected performances of the radio / antennas in term of power, gain, area to be covered...?

The proposed solution must support different tactical voice and data radio interconnection and bridging, but should not provide tactical radios. Therefore, radio performance is outside the scope of this RFI. Antenna system must support HF/VHF/UHF bands, cover 360 degrees area and have means to reduce electromagnetic footprint
